

# NEUMAN & ESSER

## Deflector Classifier DC

# NEA DEFLECTOR CLASSIFIER

The high capacity inline classifying solution

## General Description

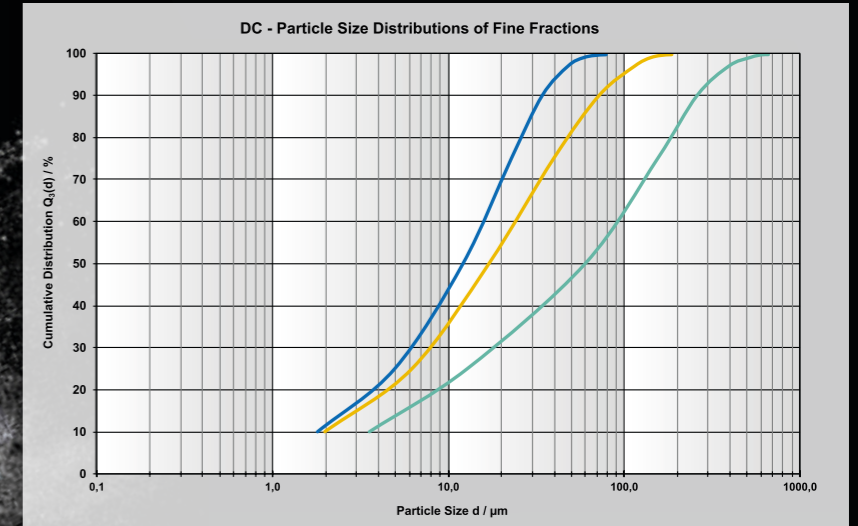

- Full process air inline classifying
- Fine fraction particle size top cut: 50  $\mu\text{m}$  - 200  $\mu\text{m}$
- Capacity: 5 t/h - 100 t/h
- Classifier power: 75 kW - 100 kW
- Air Flow: 25,000  $\text{m}^3/\text{h}$  - 150,000  $\text{m}^3/\text{h}$
- Diameter: up to 3,000 mm

## Key Features

- Integrated deflection rings for optimum air and product routing
- Unmatched capacities and energy efficiency
- Exceptional yields
- Usable with full process air flow, no pre-separation required
- Well combinable with existing grinding systems (e.g. ball mills, roller mills, impact mills)
- Optional wear protection

## Applications

- Fertilizers
- Oilfield Minerals
- Pigments & Paint
- Clay & Ceramics
- Gypsum
- Lime Cycle Carbonates
- Performance Mineral

The diagram shows different particle size distributions of the fine material fraction.

| Classifier Range | DC                    | min.   | max.    |
|------------------|-----------------------|--------|---------|
| Airflow Rates    | $\text{m}^3/\text{h}$ | 25,000 | 150,000 |
| $d_{97}$ -Values | $\mu\text{m}$         | 50     | 200     |
| Throughputs      | t/h                   | 5      | 100     |
